DESIGN IN CONTEXT

Fill this in as we work through the revision page. Each numbered arrow points at a feature — write **what it is** and **which principle it shows**. Finish the starter branches in your own words.

05 SOCIAL, MORAL & ETHICAL ISSUES

CHAPTER 05 · 3.2.3

Define the six Rs. Answer one question through each lens.

THE SIX RS

*Prevent resource use **before** relying on* _____

RETHINK _____

REFUSE _____

REDUCE _____

REUSE _____

REPAIR _____

RECYCLE _____

SUSTAINABLE & ETHICAL PRODUCTION

Where do the materials come from, and what are the *working conditions*?

CULTURAL ACCEPTABILITY

What should products and communication *avoid*? Who should be in the research?

FIVE LENSES

Ask them of any product

INCLUSIVE PRODUCTS

Which barriers can design reduce? Who else benefits?

DESIGN ADDRESSING SOCIAL PROBLEMS

Name two needs. What must a designer understand, and *avoid depending on*?

FAIRTRADE

What does it seek to improve? What can consumer recognition influence?

EXAM PRACTICE · APPLY, DON'T LIST

Choose a product. Which of the six Rs is most significant for it, and why?

MARK IT LIKE AN EXAMINER

Top: revise the content before you answer. **Bottom:** after the model answers, tick every mark-scheme point **your** answer included — the colour dots match the highlights on screen — and check the red **What NOT to award** box.

NAME _____

CLASS _____

Q1 · POSTMODERNISM · 4 MARKS
FOUR CHARACTERISTICS

State four characteristics commonly associated with Postmodernist product design. **4 marks**

REVISE · EIGHT CHARACTERISTICS — WRITE ONE FOR EACH CLUE

01 BORROWED FROM THE PAST?

02 WHAT SHOULD IT LOOK LIKE?

03 SURPRISE!

04 FORM VS FUNCTION

05 GALLERY OR KITCHEN?

06 FAMILIAR OBJECT, NEW LOOK

07 SAYING SOMETHING

08 LESS IS…?

MARK IT · ONE MARK PER DISTINCT CHARACTERISTIC

My mark /4 Peer / teacher /4

- [ ] combines or borrows features from earlier design styles
- [ ] challenges expectations about what a product should look like
- [ ] unusual, playful or deliberately surprising forms
- [ ] form may be prioritised over practical function
- [ ] products may be treated as art or statement pieces
- [ ] conventional products are reimagined in unexpected materials or forms
- [ ] products may communicate political or social messages
- [ ] rejection of strict Modernist simplicity

✗ WHAT NOT TO AWARD

Do not award separate marks for two statements that communicate the same characteristic.

- [ ] Two of my points say the same thing

REPLACE THE REPEAT WITH A DIFFERENT CHARACTERISTIC:

NEXT TIME I WILL…

Q2 · BAUHAUS & MANUFACTURING · 6 MARKS
MATERIALS FOR MASS PRODUCTION

Explain how the use of tubular steel and laminated veneers helped Bauhaus designers create products suitable for mass production. You should refer to at least one specific product in your answer. **6 marks**

REVISE · PROPERTY → SO WHAT FOR MASS PRODUCTION?

TUBULAR STEEL	LAMINATED VENEERS
Bent into lightweight, repeatable frames	Formed over moulds
→ so…	→ so…
Minimal forms, little applied decoration	Forming veneers, not cutting thick sections
→ so…	→ so…
Chrome-plated finish	Repeatability
→ so…	→ so…

Named products:

Circle the terms you used → mass production · standardisation · accessibility · machine aesthetic · form follows function

MARK IT · BEST-FIT · TICK THE INDICATIVE CONTENT YOU INCLUDED

Me: 0 · 1–2 · 3–4 · 5–6 Peer / teacher: 0 · 1–2 · 3–4 · 5–6

- [ ] tubular steel could be bent into lightweight, repeatable frames
- [ ] it supported minimal forms with little applied decoration
- [ ] chrome-plated steel produced a consistent, machine-made appearance
- [ ] this reflected form follows function and the machine aesthetic
- [ ] components could be standardised for repeat manufacture
- [ ] laminated veneers could be formed over moulds
- [ ] moulds allowed identical curved components to be reproduced
- [ ] forming veneers could reduce waste compared with cutting thick sections
- [ ] repeatability helped lower production costs
- [ ] suitable examples include the B3/Wassily chair or Cesca chair

TOP BAND (5–6) · DID I…

- [ ] explain **both** tubular steel and laminated veneers?
- [ ] make developed links to mass production or a Modernist principle?
- [ ] use at least one named example?

✗ WHAT NOT TO AWARD

Mainly describing the materials without explaining their influence stays at 1–2 marks.

- [ ] I described a material but didn't say why it helped mass production

REWRITE ONE DESCRIPTIVE SENTENCE SO IT EXPLAINS:

NEXT TIME I WILL…

Q3 · CHARLES & RAY EAMES · 6 MARKS
MODERNISM & INFLUENCE

Using specific product examples, **outline** how the work of Charles and Ray Eames represented Modernist principles and influenced later furniture design. **6 marks**

REVISE · THREE STAGES

STAGE 1	STAGE 2	STAGE 3
MOULDED PLYWOOD	FIBREGLASS	INFLUENCE
Products:	Form & colour:	On:

Why it's Modernist:

MARK IT · BEST-FIT · TICK THE INDICATIVE CONTENT YOU INCLUDED

Me: 0 · 1–2 · 3–4 · 5–6 Peer / teacher: 0 · 1–2 · 3–4 · 5–6

- [ ] pioneering moulded plywood furniture
- [ ] LCW and DCW chairs
- [ ] the use of moulds to create repeatable curved components
- [ ] development of single-piece fibreglass furniture
- [ ] simple one-piece forms
- [ ] modern manufacturing processes determining the product's form
- [ ] limited decoration and functional construction
- [ ] use of bold colours
- [ ] influence on Verner Panton's S Chair
- [ ] influence on later mass-produced or flat-pack furniture
- [ ] influence on modern furniture companies such as IKEA

TOP BAND (5–6) · DID I…

- [ ] use accurate product, material or manufacturing examples?
- [ ] connect their work to Modernist principles?
- [ ] clearly explain their influence on later furniture?

✗ WHAT NOT TO AWARD

Naming a product or material without explaining its importance is 1–2 mark work.

- [ ] I named something but didn't explain why it mattered

REWRITE ONE NAMING-ONLY SENTENCE SO IT EXPLAINS:

NEXT TIME I WILL…
